

# Region 1 Medical Training Center

Sandra Lynne Hebert

MS in Project Management

Winter, 2017

GRADUATE STUDIES  
Granite State College  
UNIVERSITY SYSTEM OF NEW HAMPSHIRE

# Why Develop a Medical Training Center?

- **CERFP** is CBRNE (Chemical, Biological, Radiological, Nuclear, & Explosive) Enhanced Response Force Package
- 27 of the 86 Air National Guard Medical units have the CERFP Mission which requires additional training
- How we're expected to comply with this training requirement:
  - Military Medical School Houses
  - Civilian Courses
- Annual Cost Saving between \$57,000 - \$112,000

# Developing a Medical Training Center +/-

- + 100% compliant with medical training requirements and ready to respond
- + Can teach all 7 disciplines to our unit and others
- + Model for others – if we can share how we obtained our successes, then they can do the same on some level
- - We lose members and their Instructor position
- - There are many requirements to adhere to and these commit ongoing resources
